PROFESSIONAL SUMMARY

Full Stack Developer with a strong backend engineering foundation, building web and mobile applications and the services behind them with Go, NestJS, .NET, React.js, Vue.js, and Flutter. Currently Head of Backend Development Section at Ganesha Operation, setting technical direction across dozens of microservices while staying hands-on with major features and critical production issues. Has delivered a React.js dashboard, Vue.js and Razor interfaces, and a Flutter (BLoC) mobile app, and designs the REST, gRPC, and WebSocket APIs that client applications depend on. Works with PostgreSQL, Redis, and RabbitMQ, and turns business requirements into maintainable, end-to-end solutions.

TECHNICAL SKILLS

Backend: Go, NestJS, .NET (C#), TypeScript, Clean Architecture, Microservices, Distributed Systems
Frontend: React.js, Vue.js, Razor, TypeScript
Mobile: Flutter (BLoC state management)
APIs & Real-time: REST, gRPC, WebSocket, Asynchronous Processing, API Integration
Databases & Messaging: PostgreSQL, MySQL, Redis, RabbitMQ
Tools & Testing: Docker, Git, Robot Framework

PROFESSIONAL EXPERIENCE

Head of Backend Development Section — Ganesha Operation, Bandung | **May 2026 – Present**

- Set technical direction for backend development across dozens of microservices (Go, NestJS) on PostgreSQL, Redis, and RabbitMQ, while staying hands-on with major features and critical production issues.
- Consolidated two real-time game services (Socket.IO and native socket) into a single architecture built on native WebSocket.
- Built Go-based scheduled jobs to process large, non-real-time datasets spanning multiple services.
- Design and maintain REST and gRPC APIs, asynchronous workflows, and real-time services used by Ganesha Operation's website and application.
- Work with engineering, business, and management stakeholders to translate business processes into technical solutions.

Backend Developer — Ganesha Operation, Bandung | **Nov 2024 – May 2026**

- Developed backend services in Go and NestJS within a microservices architecture, integrating services over REST and gRPC.
- Delivered modules for leave management, student management and progress reporting, marketing and sales data, and payments.
- Contributed to API design, database integration, and architecture decisions; investigated and resolved issues in development and production.

Frontend Developer (Freelance) — Castellum Digital Indonesia | **Sep 2024 – Oct 2024**

- Built a responsive React.js dashboard with data charts for the SATUSEHAT program, reducing page load time by 40% and increasing user engagement by 25%.

Software Engineer — Refactory | **Sep 2023 – Sep 2024**

- Developed Vue.js and Razor web interfaces and a Flutter mobile app (BLoC) alongside backend work.
- Built middleware services and APIs in .NET to integrate enterprise procurement systems (BSI KTB).
- Built Go backend APIs for high-performance web applications, including the Tempo news portal.
- Contributed to the design and integration of microservices-based enterprise systems (procurement, finance, vendor management) using Clean Architecture.
- Wrote automated tests with Robot Framework.

Freelance Software Engineer — Jerivo | **Jan 2023 – Present**

- Design and deliver software solutions to client requirements across backend, web, and application development, including implementation, debugging, and maintenance of production applications.

SELECTED PROJECTS

- **SATUSEHAT Dashboard** (Frontend: React.js): Responsive health-data dashboard with charts; improved page load time by 40% and user engagement by 25%.
- **Tempo News Portal** (Full Stack: Go, Vue.js, PostgreSQL): Content management platform for articles, users, and company data; built Go backend APIs for a high-performance web application.
- **Enterprise Procurement Integration (BSI KTB)** (Backend: .NET, Clean Architecture): Middleware services and APIs integrating enterprise procurement systems within a microservices-based design.
- **Real-time Game Services Consolidation** (Backend: Go, WebSocket): Merged two game services (Socket.IO and native socket) into one architecture on native WebSocket.

EDUCATION

Universitas Alma Ata, Yogyakarta — Bachelor of Computer Science (S.Kom), Informatics | **Sep 2019 – Aug 2023**
GPA 3.83 / 4.00
